

```
public partial class Form1 : Form
{
    int r, g, b = 0;

    private void trackBar3_Scroll(object sender, EventArgs e)
    {
        b = trackBar3.Value;
        this.BackColor = Color.FromArgb(r, g, b);
    }

    private void trackBar2_Scroll(object sender, EventArgs e)
    {
        g = trackBar2.Value;
        this.BackColor = Color.FromArgb(r, g, b);
    }

    public Form1()
    {
        InitializeComponent();
    }

    private void trackBar1_Scroll(object sender, EventArgs e)
    {
        r = trackBar1.Value;
        this.BackColor = Color.FromArgb(r, g, b);
    }
}
```
