

```
private void button1_Click(object sender, EventArgs e)
{
    double a, b, c = 0;
    try
    {
        a = Convert.ToDouble(textBox1.Text);
        b = Convert.ToDouble(textBox2.Text);
        c = a * b;

    }
    catch
    {
        MessageBox.Show("Sayı gir");
        c = 0;
    }
    finally
    {
        label1.Text = c.ToString();
    }
}
```
